Microsoft Dynamics 365 Business Central 2023 RELEASE WAVE 1 ABRIDGED

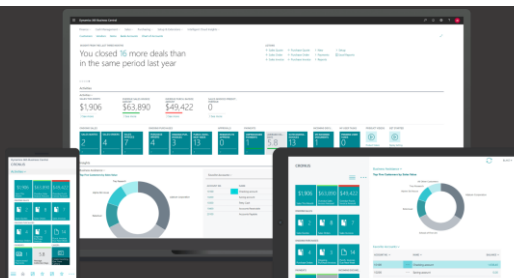

AustraliaTM
CREATING CHANGE THAT MATTERS

FEATURES HIGHLIGHTED IN THIS GUIDE

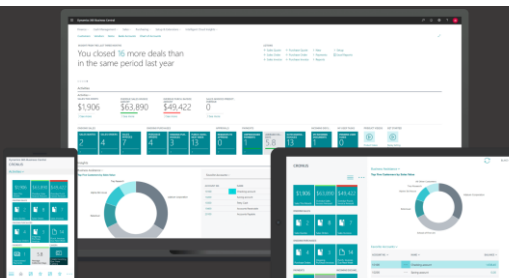

Feature	Area	Page
Review general ledger accounts faster	Account Review	5
Catalog items use standard number series; include them in blanket sales orders	Catalog Items	6
Undo transfer shipments	Inventory Transfers	7
Avoid document number errors when posting item journals	Item Journals	8
Preview item journals and 20 other journals and documents before posting	Item Journals	9
Easily create opening balances for item tracked inventory	Item Tracked Inventory	10
Set up and sync master data across companies	Master Data Sync	12
Add more columns to pages for better insight	Usability, Reporting	13
Bin Code and Zone Code fields are dynamically shown on warehouse documents	Warehouse	14
Define content of created warehouse documents with filters	Warehouse	15
Ship and receive non-inventory items on warehouse documents	Warehouse	16
Use advanced warehouse functionality with minimal complexity	Warehouse	18

Microsoft Dynamics 365
Business Central

FEATURES HIGHLIGHTED IN THIS GUIDE

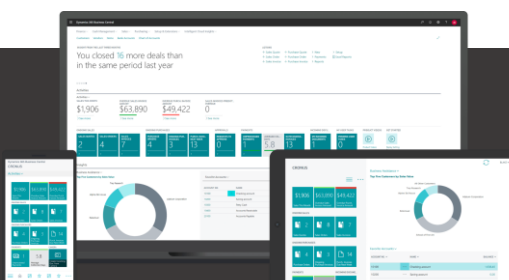

Feature	Area	Page
Analyze, group, and pivot data on list pages using multiple tabs	Reporting and Data Analysis	19
Drag and drop files onto the file upload dialog	User Experience	20
Additional Keyboard Shortcuts	User Experience	21
Introducing Copilot and AI Innovation	AI Innovation	22

Microsoft Dynamics 365
Business Central

ADDITIONAL FEATURES (USE PROVIDED LINKS)

Feature	Area
Set default dimensions on locations, inventory documents, and journals	Dimensions
Usability improvements to Financial Reporting pages	Financial Reporting
Use statistical accounts to collect data for financial reports	Financial Reporting
Intercompany posting provides a one-stop-shop setup experience	Intercompany
Navigate easier between warehouse and inventory documents	Inventory and Warehouse
Usability improves for warehouse, inventory, and tracking areas	Inventory and Warehouse
Post multiple transfer orders at the same time	Inventory Transfers
Usability improves for transfer order select multiple items, mandatory fields	Inventory Transfers
Usability improves for item tracking codes: visibility, creation of new entries	Item Tracking
Easier to set up price synchronization for Shopify	Shopify
Shopify connector becomes extensible	Shopify
Usability improves for Shopify Connector	Shopify

REVIEW GENERAL LEDGER ACCOUNTS FASTER

RELEASE NOTES

- You can now mark G/L Entries as “reviewed” indicating the entries are correct and ready for close. This is an Action on the Ledger Entries
- Marking can be done on a bulk basis in import/export
- To set up account reviews, go to the G/L Account Card page for each account, specify how to allow reviews in the Review Policy field:
 - **None:** Entries for the account cannot be marked as reviewed
 - **Review Allowed:** You don't have to include entries in a review, and the amounts of the debit and credit entries don't have to balance. You remove a review, for example, if you've made a mistake.
 - **Review Allowed and match balance:** The total amounts of the debit and credit entries in the review must match. The Debit and Credit fields show those amounts, and the Balance field shows the total. This setting also lets you remove a review. When you remove a review from one or more entries, the debit and credit entries must still balance.

ADD CATALOG ITEMS TO BLANKET SALES ORDERS

RELEASE NOTES

Add catalog item to a blanket sales order and convert it to a normal item

1. On the **Blanket Sales Orders** page, choose the **New** action.
2. On the **General** FastTab, fill in the fields as you would for any blanket sales order.
3. On a new sales line, in the **Type** field, select **Item**, but leave the **No.** field empty.
4. Choose the **Line** action, and then choose the **Select Catalog Items** action.
5. On the **Catalog Items** page, select the catalog item that you want to sell, and then select **OK**.

The catalog item is converted to a normal item. A new item card prefilled with information from the catalog item and a relevant item template is created.

UNDO TRANSFER SHIPMENTS

RELEASE NOTES

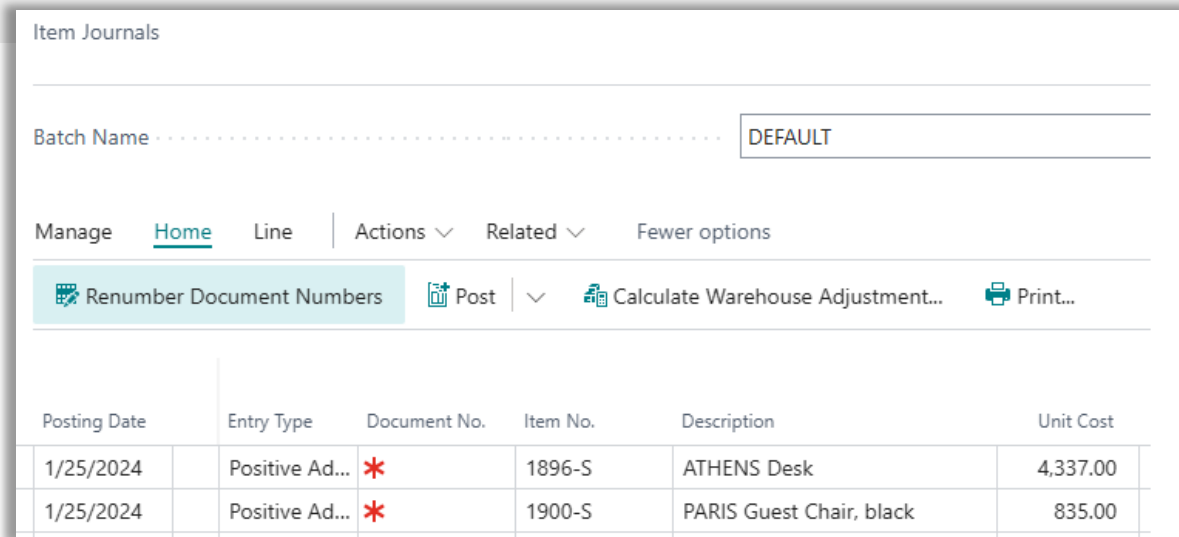

- If there is a mistake in a quantity after a transfer order is posted, as long as the shipment isn't received, a user can now easily correct the quantity. On the Posted Transfer Shipment page, the Undo Shipment action creates corrective lines:
 - The value in the Quantity Shipped field is decreased by the quantity undone.
 - The Qty. to Ship is increased by the quantity undone.
 - The Correction checkbox is selected for the lines.
- If the quantity was shipped in a warehouse shipment, a corrective line is created in the posted warehouse shipment.
- To complete the correction, reopen the transfer order, enter the correct quantity, and then post the order. If you're using a warehouse shipment to ship the order, create and post a new warehouse shipment.

AVOID DOCUMENT NUMBER ERRORS WHEN YOU POST ITEM JOURNALS

RELEASE NOTES

Posting Date	Entry Type	Document No.	Item No.	Description	Unit Cost
1/25/2024	Positive Ad...	*	1896-S	ATHENS Desk	4,337.00
1/25/2024	Positive Ad...	*	1900-S	PARIS Guest Chair, black	835.00

- “Renumber Document Numbers” Function added to Item Journals
- If related journal lines were grouped by document number before you used the action, they'll stay grouped but might be assigned a different document number.
- The Renumber Document Numbers action also works on filtered views.
- “If a number series is specified in the No. Series field on the item journal batch, document numbers for individual or grouped lines must be in sequential order when you post an item journal. If they aren't, you can't post the journal. To avoid problems with posting, you can use the Renumber Document Numbers action on the Item Journals page before you post the journal. ”

PREVIEW ITEM JOURNALS BEFORE POSTING

[RELEASE NOTES](#)

Preview Posting has been added to many Inventory related journals:

- Warehouse Shipment
- Transfer Order
- Assembly Order
- Production Journal
- Warehouse Receipt
- Item journal
- Inventory Pick
- Capacity Journal
- Recurring Consumption Journal
- Recurring Capacity Journal
- Item Reclass. Journal
- Job Journal
- Phys. Inventory Journal
- Output Journal
- Inventory Put-away
- Consumption Journal
- Physical Inventory Order
- Revaluation Journal
- Invt. Shipment
- Invt. Receipt
- Recurring Job. Journal

EASIER TO CREATE OPENING BALANCES FOR ITEM TRACKED INVENTORY

RELEASE NOTES

Two new functions to assist

- Users can enable specific batch es on the Item Journal page to let people enter serial, lot and package data direction on journal lines
- Where **Directed Put-away and Pick** toggle is turned on, you can use the **Warehouse Physical Inventory Journal** page to make all item tracking fields available. The fields that are available now include the **Warranty Date** and **Expiration Date** fields.

- Where **Directed Put-away and Pick** toggle is turned on, you can use the **Warehouse Physical Inventory Journal** page to make all item tracking fields available. The fields that are available now include the **Warranty Date** and **Expiration Date** fields.
- Can't use Edit in Excel on these Journal fields yet

SETUP AND SYNC MASTER DATA ACROSS COMPANIES

[RELEASE NOTES](#)

- Moving Master Data works when a company “subscribes” to data from another company
- Users define the tables and fields to sync, with capacity to add filters
- Changes in the main company are immediately pulled to the receiving companies by the job queue
- Users in the receiving company can review synchronization logs.

ADD MORE COLUMNS TO PAGES FOR BETTER INSIGHT

RELEASE NOTES

FIELDS	HOW	NOW AVAILABLE HERE
The Gen. Bus. Posting Group Gen. Prod. Posting Group VAT Bus. Posting Group, and VAT Prod. Posting Group fields	can be added by personalizing the Lines FastTab on	Most sales and purchase documents

BIN CODE AND ZONE CODE FIELDS SHOWN ON WAREHOUSE DOCUMENTS

[RELEASE NOTES](#)

When the Bin Mandatory toggle is used for a location, the Bin Code and Zone Code fields are now included on:

- Warehouse receipt HEADER and LINES
- Warehouse put-away lines
- Warehouse shipment HEADER and LINES

Microsoft Dynamics 365
Business Central

DEFINE CONTENT OF CREATED WAREHOUSE DOCUMENTS WITH FILTERS

RELEASE NOTES

Inventory Picks, Put-away and Movements can be Filtered more precisely, as to direct the warehousing team more efficiently. Additional fields include:

The screenshot shows the 'Create Inventory Put-away/Pick/Movement' dialog box. It has a title bar with a refresh icon and a close icon. Below the title bar, there is a dropdown menu for 'Use default values from' set to 'Last used options and filters'. Under the 'Options >' section, there is a 'Filter: Warehouse Request' section with three dropdown menus: 'Source No.' (1011), 'Source Document' (Inbound Transfer|Outbound Transfer), and 'Location Code'. Below this is a '+ Filter...' button. The 'Filter: Document details' section has four dropdown menus: 'Item No. Filter' (1906-S), 'Variant Code Filter', 'Job Task No. Filter', and 'Prod. Order Line No. Filter'. At the bottom, there is a 'Filter totals by:' section with two dropdown menus: 'Inbound Date Filter' (01/26/22) and 'Outbound Date Filter'.

- Purchase orders and purchase return orders: The Planned Receipt Date of the purchase line.
- Sales orders and sales return orders: The Shipment Date of the sales line.
- Job usage: The Planning Date of the job planning line.
- Outbound transfer orders: The Shipment Date of the transfer line.
- Inbound transfer orders: The Receipt Date of the transfer line.
- Production output: The Due Date of the production order line.
- Production consumption: The Due Date of the production order component line.
- Assembly consumption: The Due Date of the assembly line.

SHIP AND RECEIVE NON-INVENTORY ITEMS ON WAREHOUSE DOCUMENTS

RELEASE NOTES

- Two new functions to assist in the allocation of warehouse activities to the warehouse workers
 - Post all non-inventory lines on the source documents as soon as at least one item is posted by the warehouse document
 - Post non-inventory lines of the source document linked to the item through the Attached to Line No. Field when the item is posted by the warehouse document
- Note: Shipping advice “Complete” takes priority over this feature
- Next slide will show the configuration of this feature

SHIP AND RECEIVE NON-INVENTORY ITEMS ON WAREHOUSE DOCUMENTS, CONT.

RELEASE NOTES

To start using this feature in the inbound warehouse flow, fill in the **Auto Post Non-Invt. via Whse.** field on the **Purchase & Payables Setup** page.

USE ADVANCED WAREHOUSE FUNCTIONALITY WITH MINIMAL COMPLEXITY

[RELEASE NOTES](#)

You no longer need to use Directed Pick and Puts in order to use the following:

- Zones
- Movement worksheet
- Calculate Bin Replenishment task
- Bin Capacity Policy
- Warehouse class check
- Special equipment in warehouse documents

This is big for flexibility!

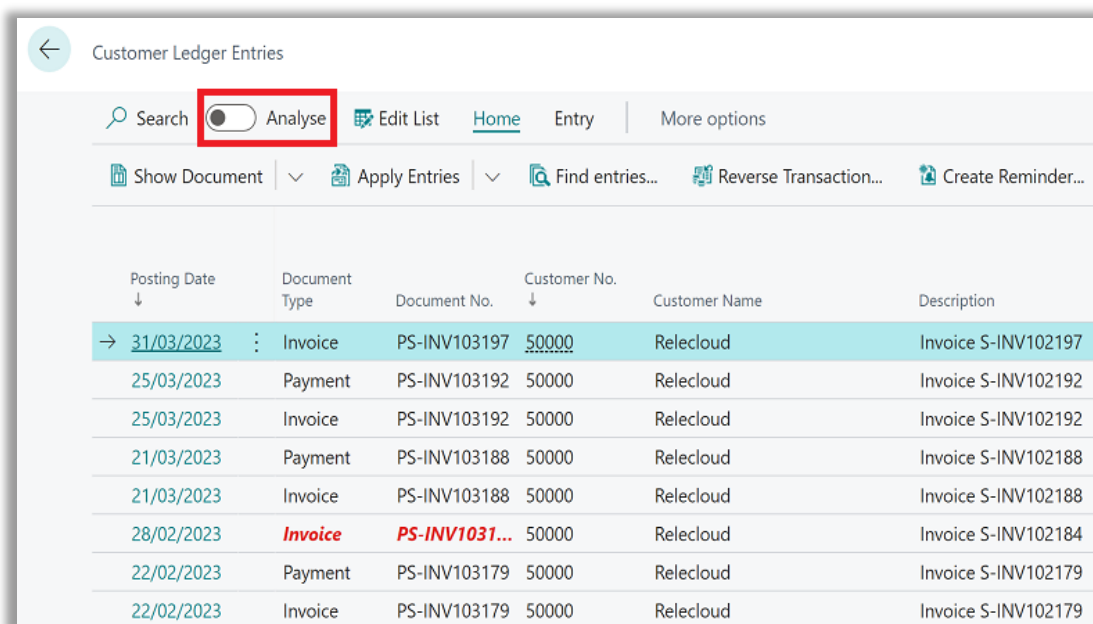

ANALYZE, GROUP, AND PIVOT DATA ON LIST PAGES USING MULTIPLE TABS

[RELEASE NOTES](#)

You can now analyze data from LIST PAGES in BC! No need to open the page in Excel or run a report.

- Known as Analysis Mode
- Add multiple tabs that represent different tasks or views on the data e.g.: My Customers, Follow Up Items, Recently Added Vendors
- When ready to analyze data on a list page, instead of filtering data using a view or filter pane, switch to the analysis mode:

The screenshot shows the 'Customer Ledger Entries' page. At the top, there is a search bar and a toggle switch labeled 'Analyse' which is currently turned on and highlighted with a red box. Below the search bar are several action buttons: 'Show Document', 'Apply Entries', 'Find entries...', 'Reverse Transaction...', and 'Create Reminder...'. The main part of the page is a table with the following columns: Posting Date, Document Type, Document No., Customer No., Customer Name, and Description. The table contains several rows of data, with the first row highlighted in light blue.

Posting Date	Document Type	Document No.	Customer No.	Customer Name	Description
